Wajra O' Force have shown their willingness to collaborate with Vidushi Gargi Centre for Women Development of GTU and have invited us to serve as their knowledge partners for Wajra's her STEAM – Life Skills project. As a part of this collaboration, female faculty members and of various PG Schools have visited the schools adopted by the foundation to educate the young girls on various topics in order to boost their motivation to continue with their education.

A similar session was conducted at Vasna School on 18th January,2024, where Dr. Neelam M. Nathani and her team delved into the causes of diseases and survival strategies against them .Students were introduced to the microscopic world by observing leaves under a microscope, gaining insights into the food transport system in plants.

The session concluded with an enthusiastic display of dancing and singing by the students. Importantly, the students were keen on understanding how science could shape their future careers.
